

Organisation

Organisation

BAM creates sustainable built environments across the world that enhance people's lives and create maximum value for our stakeholders by combining a diversity of people that capitalise on state-of-the-art knowledge, resources and digital technologies to provide construction solutions.

BAM International is an operating company of Royal BAM Group, a European construction group that undertakes projects worldwide. BAM International represents the world wide activities of the Group outside its European home markets.

We offer a complete range of services in all fields of construction worldwide in all phases of the construction process, including design, for marine, building, infrastructure and industrial projects. In addition BAM International has access to the technical, organisational know-how and experience of the other operating companies within the Group.

Our projects are performed by experienced project teams based at the construction sites. These teams consist of our own staff and locally trained personnel.

Constant support is given by the head office in The Hague, the Netherlands and by our offices in the areas.

We have modern techniques and software available for feasibility studies, planning and organisation, safety, quality assurance and quality control, logistics, procurement, expediting, accounting, administration and design control.
