## Conference Palace Hotel (Emirates Palace), Abu Dhabi, United Arab Emirates

Located in the capital of the United Arab Emirates, the magnificent Emirates Palace is a national landmark and one of the most impressive hotels and conference venues ever built. The hotel is located on 1.3 kilometres of white sandy beach and surrounded by 85 hectares of beautifully landscaped gardens. By any standard this is an impressive achievement in terms of sheer volume, quality and safety.

The triumphal arch over the entrance drive alone is larger than many city hotels. Not surprisingly, the arrival of kings and queens, heads of state and similar luminaries is a weekly occurrence and in fact all guests will feel like royalty. Put simply, the Emirates Palace is one of the most luxurious (and enormous) hotels ever imagined - and the most sumptuous accommodation that was built for Abu Dhabi's ruling family.

**Location** Abu Dhabi, United Arab Emirates

**Client** Conference Palace Hotel Executive Committee

**Contractor** Arabian Construction Company/BAM International Abu Dhabi LLC (formerly Interbeton)

**Contract period** April 2002 – December 2005

**Contract sum** €150 million

*‘Widely recognized  
as the most prestigious  
building project in Abu Dhabi.’*

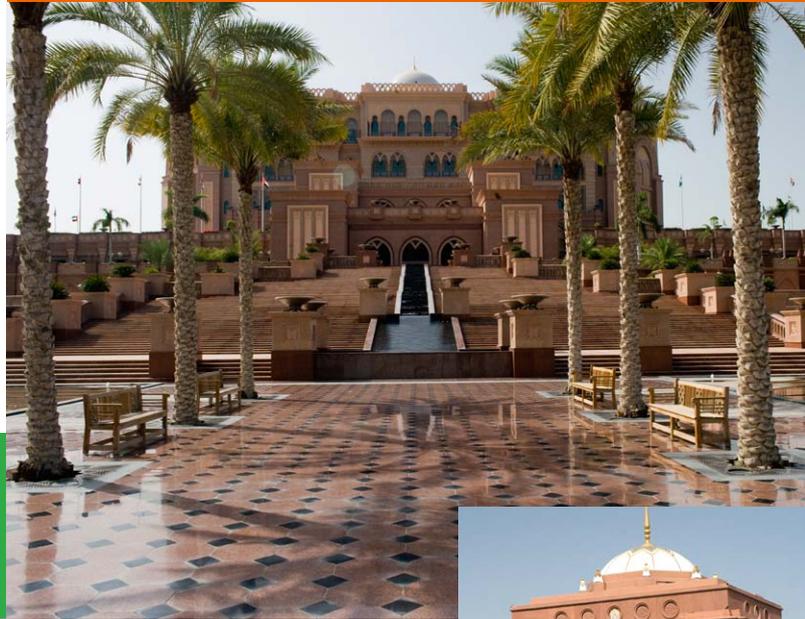

### Scope of work

BAM International completed the work for the Emirates Palace in 2005. Our company built the structural works for the west and east hotels of the Emirates Palace, including the underground three- story car park, the central integral garage and access ramps to all levels.

### Triumphal arch

BAM constructed the 40 metres high triumphal arch with dome that is being used as the exclusive entrance for the royal family. This part of the work included 3.5 kilometres boundary wall with metal fencing and marble cladding, as well as 50 ancillary buildings ranging from guardhouses to health spas.

Furthermore BAM executed all external works to the hotel and the soft landscaping, two full size swimming pools and other water features with associated plant rooms and helipad with emergency fire foam system.

### Marble floors

In total BAM International executed 9,000 m<sup>2</sup> of marble floor works for the hotel's public areas, staircases and corridors

Finishing works included associated structural, mechanical, electrical and plumbing works, acoustics, IT, security, supply and commissioning of all kitchen and laundry equipment.
