

## Consolidated Safety Records (2012 – 2016)

	2012	2013	2014	2015	2016
<b>Man-hours worked (x1,000)</b>	16,988	28,821	18,811	24,713	20,452
<b>Number of fatalities</b>	1	1	2	0	0
<b>Lost time Incidents</b>	22	27	10	12	7
<b>Total number of Reportable Accidents</b>	23	28	12	14	10
<b>First Aid Cases</b>	90	594	245	183	90
<b>Near Misses</b>	247	535	504	341	139
<b>Number of lost days for Reportable Accidents</b>	361*	455*	566*	338	155
<b>Good Practice reports</b>	86	596	316	163	44
<b>Rates:</b>					
<b>Frequency Rate (OSHA) per 200,000 man hours</b>	0.27	0.19	0.13	0.11	0.09
<b>Severity Rate</b>	15.7	16.3	47.2	24.1	15.5
<b>IF (BAM) per 1,000,000 man hours</b>	1.35	0.97	0.64	0.57	0.49

\* Included 180 lost days due to fatality.

### Remarks:

Frequency rates and severity rate are calculated using the following formulas :

$$\text{Frequency rate (OSHA)} = \frac{\text{No. of Reportable Accidents}}{\text{Total manhours worked}} \times 200,000$$

$$\text{IF (BAM)} = \frac{\text{No. of Reportable Accidents}}{\text{Total manhours worked}} \times 1,000,000$$

$$\text{Severity rate} = \frac{\text{No. of Lost Days}}{\text{No. of Reportable Accidents}}$$
